MINI RAFT RIDE

MINI RAFT RIDE

Pure water enjoyment!

Using the know-how and the experience gained from our large raft rides, we have now developed an **alternative with smaller 4-person boats** (diameter = 2.25 m) suited for **parks with limited space and lower capacity requirements**. These rides offer the same pleasurable experience and advantages as our larger installations, but with **a reduced and very favorable investment, as well as reduced operating costs**.

For **more detailed information**, please refer to the main HAFEMA leaflet **“Wild Raft Ride”**.

Technical data (example)

System

Channel Length: 250 – 350 m

Aluminium Conveyor System

Height: 2.5 – 3.0 m

Operating velocity: 0.25 m/s

Main submersible pumps: 2 x 55 kW

Discharge: 3 m³/s

Single cockpit boat

Number: 8 – 12

Passengers each: 4

Capacity: 480 – 720 passengers/hour

Upgrade to a thrill ride!

The “Mini Raft Ride” is the perfect basis to create a unique thrill ride experience. Spectacular ride moments are created utilizing an inclined **or vertical** lift system, to transport the boats up to a height **up to 20 meters**; from there a turbulent ride is started with chutes, and drops leading to the ultimate fun, the spiral where the boats start spinning rapidly!

This ride system is also available for **indoor usage**; an area of 80 by 60 meters is sufficient to create such an extraordinary ride.

Technical data (example)

Basis of Ride:	“Mini Raft Ride“ with station conveyor system
Lift system:	Inclined lift, chain driven with aluminum slats
Pump system:	2 x 25 kW pumps ground floor; 1 x 160 kW filling pump
Ride length:	Approx.: 480 meters
Max. speed:	Approx.: 7 m/s
